HOW TO ORDER

Ordering your Printed Products with ROSTAMI™ is a simple **3 step process.**

STEP ONE PRODUCT DETAILS

Send an email to info@rostami.com.au with the details of the products you want to order. Make sure to include the following information:

- Product Name
- Quantity
- Any special requirements

STEP TWO DESIGN

Send through a print-ready PDF of the artwork. For more information be sure to read the Artwork Requirements on the following page.

If artwork is too large for email, get in contact with us for FTP details.

If you require ROSTAMI™ to create the artwork, send through the details.

STEP THREE PERSONAL DETAILS

Let us know your company or personal details for delivery:

- Company or Personal name
- Contact Details
- Delivery Address

ARTWORK REQUIREMENTS

All products disclosed in the ROSTAMI™ printing menu require print-ready artwork being supplied in Adobe PDF format only. Please produce each PDF using the following specifications:

- Include trim marks only, no registration marks, page information or colour bar
- Include 3mm bleed on all documents
- Ensure that the final artwork is centred within its page, all imposition software assumes that a documents trim marks are centred within the larger page. It takes our prepress department time to correct this issue and will slow down the production of your order
- Multipage documents are to be supplied as one PDF, please do not output as spreads or try to impose pages
- Business card documents are to be supplied as one PDF, page one is the front, page two is the back, please do not put both on one page
- Insure the PDF itself and all files used to create the PDF are in CMYK colour mode not RGB and have a resolution of 300ppi
- Ensure that all fonts are embedded within the PDF
- Check for overprint issue in the output preview feature of Acrobat Pro, remembering that solid black is the only colour that you want to overprint everything else should knockout
- Ensure that you understand the four colour printing process and the results that can be expected from your colour breakups and your press ready PDF, the output preview feature of Acrobat Pro is a quick and easy way of reading individual separation values

WHAT WE DO WITH YOUR PRINT-READY PDF FILE

Your files will be automatically preflighted for appropriate resolution, font usage, correct colour mode and sufficient bleed. If we encounter any problems at this stage you will be notified of the issues, however we cannot guarantee that file problems will be detected as **responsibility for correct file generation lies with the client.**
